Summary

Aspiring Data Analyst with a strong foundation in programming, machine learning, and data visualization. Skilled in using tools like Python, SQL, and Power BI to draw insights from data. A quick learner and team player, eager to contribute to impactful, data-driven projects.

Skills

- Programming Languages (C, C++, Python, R, SQL)
- Data Analysis (MS Excel, Power BI, Tableau, ML Fundamentals)
- Analytical Thinking, Critical Reasoning, Fast Learner, Team Collaboration

Experience

Accelerator X   Remote   Data Analytics Intern (Business Development Associate Jan 2025 – March 2025**)**

- Built & maintained 3 Power BI dashboards tracking KPIs and sales metrics; automated reporting to reduce manual effort
- Analyzed 1,000+ records to identify customer behavior trends, boosting conversions by 28%
- Delivered insights that helped close 5 sales in month 1; awarded "Best Intern" based on internal and client feedback

Projects

- **Houston Housing Price Prediction Model**: Developed a Python regression model on 80,000+ entries (R^2 = 0.89); performed feature engineering & visualized results with Seaborn/Matplotlib
- **Amazon Sales Dashboard**: Created an interactive Power BI dashboard using DAX and drill-throughs for regional sales performance; cut reporting time by 40% via automation

Certifications

- ***Microsoft Azure Machine Learning for Data Scientists (Coursera)****: Built, trained deployed ML models at scale in Azure ML Studio; hands on with regression, classification & responsible AI tools*
- ***Google Data Analytics Professional Certificate (Coursera)****: Mastered data cleaning, analysis & visualization with spreadsheets, SQL & Tableau; completed real world case studies*

Education

Jain University   **Bengaluru, KA**
Bachelor of Computer Applications - Data Analytics (GPA: 8.0)
